Choose one of these options :
    1. Represent
    2. Show me how many computers there are in the lab
    3. Add programming languages
    4. Change the subject
    5. Update the number of PC
    6. Delete languages from programming language list
    7. Quit
------------------------------------------------------------
1
The no. of the lab is : 1
Choose one of these options :
    1. Represent
    2. Show me how many computers there are in the lab
    3. Add programming languages
    4. Change the subject
    5. Update the number of PC
    6. Delete languages from programming language list
    7. Quit
------------------------------------------------------------
2
There are  30  computers in the lab.
Choose one of these options :
    1. Represent
    2. Show me how many computers there are in the lab
    3. Add programming languages
    4. Change the subject
    5. Update the number of PC
    6. Delete languages from programming language list
    7. Quit
------------------------------------------------------------
```

```
------------------------------------------------------------
3
Type the programming languages that you want to add with ',' between
them: Python,Java,C,C++
Current list :  ['Python', 'Java', 'C', 'C++']
Choose one of these options :
    1. Represent
    2. Show me how many computers there are in the lab
    3. Add programming languages
    4. Change the subject
    5. Update the number of PC
    6. Delete languages from programming language list
    7. Quit
------------------------------------------------------------
4
Enter the subject's name : Algorithms 101
The subject has been changed successfully! New subject :  Algorithms
101
Choose one of these options :
    1. Represent
    2. Show me how many computers there are in the lab
    3. Add programming languages
    4. Change the subject
    5. Update the number of PC
    6. Delete languages from programming language list
    7. Quit
------------------------------------------------------------
5
New number : 15
15
There are  15  computers in the lab.
Choose one of these options :
    1. Represent
```

```
5
New number : 15
15
There are  15  computers in the lab.
Choose one of these options :
    1. Represent
    2. Show me how many computers there are in the lab
    3. Add programming languages
    4. Change the subject
    5. Update the number of PC
    6. Delete languages from programming language list
    7. Quit
------------------------------------------------------------
6
Type the programming languages that you want to delete with ','
between them: Java,Python
Current list :  ['C++', 'C']
Choose one of these options :
    1. Represent
    2. Show me how many computers there are in the lab
    3. Add programming languages
    4. Change the subject
    5. Update the number of PC
    6. Delete languages from programming language list
    7. Quit
------------------------------------------------------------
7
The program has been shut down.
